

News Release

CDI Included on the InformationWeek 500 List of Top Technology Innovators

Philadelphia (September 16, 2010) – CDI Corp. (NYSE: CDI) today announced that it has been named to the InformationWeek 500, an annual listing of the nation's most innovative users of business technology, for the tenth year in a row. The 2010 InformationWeek 500 companies were revealed on September 14, 2010 at an awards ceremony held during the InformationWeek 500 Conference in Dana Point, California.

InformationWeek identifies and honors the nation's most innovative users of information technology with its annual listing. The list is unique among corporate rankings because it spotlights the power of innovation in information technology, rather than simply identifying the biggest IT spenders.

"For 22 years, the InformationWeek 500 has honored the most innovative users of business technology," said InformationWeek Editor-in-Chief Rob Preston. "As we start to emerge from the worst recession in decades, the IT focus is now on driving growth – new sources of revenue, new relationships with customers, even new business models. This year's ranking placed special emphasis on those companies and business technology executives leading that charge."

"We are proud to receive this recognition," said Vince Squillacioti, Senior Vice President, Chief Information Officer of CDI. "This ten year milestone of CDI's appearance on the InformationWeek 500 further validates our ability to develop leading-edge business technology strategies that maximize productivity and return on investment."

Additional details on the InformationWeek 500 can be found online at www.informationweek.com/iw500/.
