## CDI IT Solutions Announces Agreement with SysTest Labs

Philadelphia (September 8, 2008) – CDI IT Solutions (CDI), a division of engineering and IT outsourcing leader CDI Corp. (NYSE: CDI), today announced that it has entered into a teaming agreement with SysTest Labs, Incorporated, a national leader in software testing and quality assurance, to provide complete quality assurance and testing solutions to the CDI customer base.

“IT departments worldwide have recognized that one of the key foundations for providing business technology solutions for their customers depends on the effective and pervasive use of quality assurance processes, methodologies and tools,” said Andrew Cvitanov, President of CDI IT Solutions.

“CDI has deep domain expertise in the quality assurance discipline, bolstered by methodologies and templates that can meet stringent certification requirements such as CMMi and PMM. Teaming with SysTest Labs allows us to expand our offering through quality assurance engineers who are certified by the International Software Testing Qualifications Board (ISTQB) and the Project Management Institute (PMI). By combining complementary quality assurance skillsets and similar industry experience, CDI and SysTest Labs are offering more comprehensive and competitive outsourcing options to our customers.”

While providing a full range of quality assurance solutions, the agreement between CDI and SysTest Labs also allows for additional offerings such as software security services including information security governance, compliance management and a wide spectrum of specialized risk assessments to meet the security requirements of SAS 70, FFIEC, ISO17799, HIPAA, PCI, and NIST 800-53a controls. CDI, through the relationship with SysTest Labs, can now also conduct application vulnerability assessments, network and application penetration testing, security vulnerability remediation and contingency plans for disaster recovery and incident response.

“I’m particularly pleased that CDI recognizes the value a company like SysTest Labs brings to this relationship. The synergies and combined strength of the CDI/SysTest Labs team allow for a broader base of quality assurance solutions to meet the increasingly complex software testing demands of today’s customers,” remarked Brian Phillips, President and CEO of SysTest Labs.

Added Cvitanov, “With this agreement, we can provide a complete solution for our clients’ quality assurance needs. CDI has a strong process base and we can now offer both the tools and the processes to meet industry standards, allowing us to become a more effective IT partner for our clients.”
